

Postdoctoral Position

A postdoctoral position is available immediately in the laboratory of Dr. Navid Zobeiry to develop a novel machine learning method for material characterization and material discovery. This is an exciting position to work closely with several industrial partners while participating in research activities of the new Advanced Composites Center at the University of Washington.

Requirements:

- Degree in materials science, polymer science or mechanical engineering
- Experience in characterizations of polymers or composites: DSC, TGA, FTIR, DMA ...
- Experience in data science methods
- Proficiency in Python coding
- Legally authorized to work in the United States

Contact Information:

Navid Zobeiry, PhD
Assistant Professor
Materials Science & Engineering Department
